

# Recycled water is safe and economical to use

Starting from 1 March 2026,  
recycled water is supplied to the **University of Macau**  
and **Seac Pai Van public housing complex**

Recycled water is supplied to both residential and commercial users of Koi Nga, Lok Kuan and Ip Heng Building

\*On Son Building, constructed earlier without a dual pipe system, does not meet the conditions for recycled water supply

## Uses of Recycled Water

Toilet Flushing

Landscape Irrigation

## Quality of Recycled Water

- Safe and hygienic
- Colourless and odourless
- In compliance with water safety standards
- Macao Water conducts recycled water tests every day and announces the results, ensuring it is safe and hygienic

### Illustration of water bill

#### Meter reading

Drinking water	xx	Recycled water	xx
----------------	----	----------------	----

#### Calculation

Drinking water	\$xx.xx	Recycled water	\$xx.xx
----------------	---------	----------------	---------

Amount due **\$xx.xx**

## Water Bill

- Each water bill itemises the consumption and charges for both **drinking** and **recycled water**, allowing users to make **a single payment for the total amount**
- Users are not required to submit an additional application, and can use water as usual
