

Source and Uses

Quality of Recycled Water

- Colourless and odourless
- In compliance with water safety standards
- Macao Water conducts recycled water tests every day and announces the results on its webpage to ensure it is safe and hygienic

Recycled Water Pipes

- Recycled water pipes are purple
- Drinking water pipes are generally white, grey and brass
- Easy for users and technicians to distinguish between drinking water pipes and recycled water pipes
- Users must not change the intended use of recycled water or modify its piping without authorisation

Recycled Water Supply Zones

Seac Pai Van

- Lok Kuan Building (Block 1 to 6)
- Ip Heng Building (Block I to X)
- Koi Nga Building (Block 1 to 8)
- Seac Pai Van Social and Health Services Building
- Seac Pai Van Public School
- Language Teaching Activity Centre
- Vocational Technical Education Activity Centre
- Seac Pai Van Community Complex

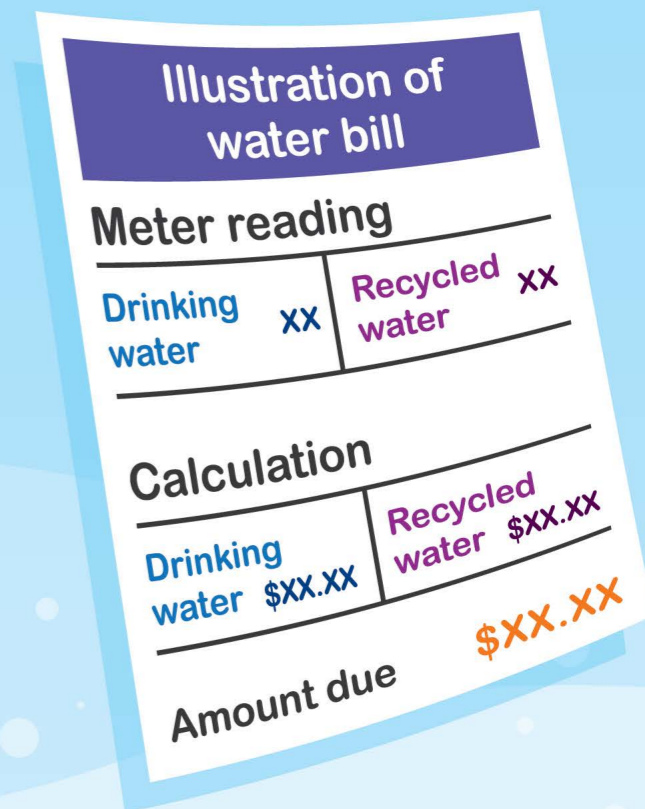

University of Macau

- University of Macau
- Hengqin Island Operation Station of Fire Services Bureau
- University of Macau New Campus Police Station of the Public Security Police Force

*The residential flats and commercial spaces etc. in the above buildings are equipped with a dual pipe system
 *Users are not required to submit an additional application, and can use water as usual
 *On Son Building, constructed earlier without a dual pipe system, does not meet the conditions for recycled water supply

Water Bill

- Consumption and charges for both drinking and recycled water are itemised
- Users make a single payment for the total amount
- Users are not required to submit an additional application

*Recycled water is currently used for toilet flushing and landscape irrigation. It is not for drinking.
